

Vision

“To be a center of excellence in nurturing skilled and compassionate nursing officers through progressive education, transformative learning experiences, and impactful research, ensuring a healthier society for all.”

Mission

- Create opportunities for nursing education to all deserving individuals, ensuring access based on merit and commitment.
- Implement nursing programs that respond to evolving societal needs in an interconnected world.
- Cultivate knowledge and skills that empower individuals to serve with competence, integrity, and dedication.
- To do meaningful research that contributes to societal well-being and enhances the collective understanding of healthcare advancements.
- Collaborate with healthcare Organization and academic institutions, fostering mutual growth and addressing the needs of all stakeholders.
- Integrate technology-driven learning and governance for enhanced educational experiences and institutional efficiency.
- Embed a culture of excellence through continuous innovation and commitment to holistic service.
